| Reference | | | | | | |
| Syllabus | The content of this course is based on the current trend of technological development, selected several advanced and interesting technology articles, including tablet computers, touchscreens, drones, VR virtual reality and other related technology industries. The class will be conducted in a word-by-word and sentence-by-sentence manner so that students can learn the English words of technology, listen to them, and learn new knowledge about technology. It is expected that students will be able to improve their English reading skills through this course. | | | <ol style="list-style-type: none"> 1.
